Description

Sedum Atlantis shows a fascinating combination of colors: green leaves with cream-colored edges, pink flower buds, cherry red leaf buds and yellow flowers in summer. The foliage retains its color during the summer and autumn. Atlantis has a dense growth and remains low until about 4-6" high and 18"cm wide. Plant Atlantis in an average to dry soil that is well-drained. Atlantis stands preferably in full sun but also tolerates partial shade. It is a beautiful plant for in, for example, the rock garden, for green roofs, as a ground cover or in a container on terrace or balcony. Heat resistant, drought resistant, humidity resistant, disease free, so the ideal plant for everyone!

USDA zone: 4b
